

ENVIRONMENTAL POLICY

At Chiller Box we are committed to continually trying to improve our environmental policies.

OUR ENVIRONMENT, OUR WORLD

In order to improve our environmental efforts, we propose the following:

- Providing training and education for our employees on environmental issues
- Promoting products that are as environmentally friendly as possible
- Offering a disposal service which is safe, maximises recycling opportunities, and is in line with relevant legislation
- Using paper manufactured from recycled materials or materials from sustainable sources wherever possible
- Recycling printer cartridges
- Keeping waste to a minimum and promoting recycling where practical
- Minimising waste produced through business activities and looking for innovative ways to recycle waste materials
- Encouraging employees to use public transport, and share cars wherever possible
- Reviewing progress on environmental issues on an annual basis

This policy will be subject to an annual review or when process conditions change.
